

Safinah Ali

Graduate Student - Personal Robots Group, MIT Media Lab

safinah@mit.edu | 412.313.1433 | safinahali.github.io

EDUCATION

Doctorate in Media Arts and Sciences 2019 -

Massachusetts Institute of Technology

Master's in Media Arts and Sciences 2017 - 2019

Massachusetts Institute of Technology

Master's in Human Computer Interaction 2015 - 2016

Carnegie Mellon University

Bachelor's in Design 2011 - 2015

Indian Institute of Technology Guwahati

RESEARCH INTERESTS

Human Robot Interaction, CS & AI Education, Interaction Design, Social Robotics, Human Computer Interaction, Interactive Games, Social Computing

RESEARCH PROJECTS

Designing Child Robot Interaction for Facilitating Creative AI Learning 2018 - 2019

Mentors: C. Breazeal, M. Resnick, S. Osterweil, R. Picard

Designing novel child robot interactions for collaborative problem solving in AI with the goal of fostering creativity in children. Developing a novel architecture for artificial creativity, and scaffolding for creative thinking through game decisions, and verbal and non-verbal behaviors. Evaluating the effect of the robot companion's behavior on children's creative problem solving.

Long Term Child Robot Interaction to Foster Curiosity & Growth Mindset 2018

Mentors: H. Park, C. Breazeal

Developed and evaluated a novel expressive cognitive-affective architecture that synergistically integrated models of curiosity, understanding of mindsets, and expressive social behaviors.

Developed algorithms for artificial curiosity, artificial mindset, and the verbal and non-verbal expressiveness in a social robot companion for children. We conducted a longitudinal study, where we evaluated the robot companion's ability to sustain engagement and promote children's curiosity and growth mindset for improved learning outcomes in an educational play context.

Curiosity Assessment during Child Robot Interaction Fall 2017

Mentors: C. Breazeal, R. Picard

Used game design and human robot interaction design principles to elicit curiosity in children while they play the learning game iSpy, with a curious robot Tega. Studied children's affects during high curiosity / uncertainty states. Used correlation analysis of affect and curiosity states to model children's curiosity and build a real time curiosity sensing model during child robot interaction.

Robotic Alternative Augmentative Communication tools for Autism Spring & Summer 2018

Mentor: C. Breazeal, R. Picard

Designed and evaluated a communication tool that makes use of the social robot Jibo's speech and expressivity to help children with ASD with social and emotional communication. Designed and validated alternate modes of emotional self report for children with ASD.

Emotional Reappraisal through Generative Art *Fall 2017*

Mentor: P. Maes

Created generative digital art, aesthetically derived from a person's emotional states (valence and arousal), especially while recalling a memory of high affect. Gradually change the aesthetics of these art pieces to reflect positive valence, as an attempt to provide cognitive reappraisal therapy.

Sensing curiosity in play *August 2015 - March 2017*

Mentors: J. Hammer, G. Kauffman, A. To

Conducted a literature review on models of curiosity. Identified varieties, antecedents, and consequences of curiosity. Reviewed how each type of curiosity can be manifested during play. Participated in ideating for, prototyping, and playtesting games to encourage STEM comfort and engagement through increased curiosity.

Sonify, making visual graphs accessible *Spring & Summer 2016*

Sponsor: Bloomberg L.P.

Mentors: B. John, R. Ram, D. Gulley, K. Berntsen, G. Minnaret

Conducted contextual research in computer accessibility to identify challenges faced by desktop users with disabilities. Prototyped solutions to make visually complex content more accessible to people with vision impairments. Developed and evaluated the technology and interactions for Sonify, an audio and tactile interface to make data visualization accessible.

Studying the role of guilt in Human Robot Interaction *Spring 2016*

Mentor: I. Nourbakhsh

Designed and ran an experiment to study how human involvement in the malfunctioning of a robot affects their pro-activeness in fixing it. Prototyped a robot that interacted with humans to stop functioning under different circumstances, varying human responsibility and guilt. Collected data through sensing, observation and post-test surveys. Analyzed data and reported findings.

RobotTutor, an open source tablet based learning tool *Fall 2015*

Mentor: J. Mostow

Designed the Arithmetic module of the RoboTutor project that is now a finalist in Global Learning XPRIZE competition (winning \$1 million). The module aims to teach single-digit addition and subtraction to elementary school children.

Designing wearable computers for pre-diabetic patients *2014 - 2015*

Mentor: K. Sorathia. Sponsor: Nokia Research

Designed a wearable tool that uses intrinsic motivation and goal setting to persuade pre-diabetic patients to follow lifestyle prescriptions. Deployed an Android Wear compatible health monitoring application for pre-diabetic patients that visualizes real-time physical activity, temperature and stress levels. Evaluated the application with 21 pre-diabetic patients. 12% avg. increase in rate of activity.

Studying the role of audio-cues in learning *2013*

Mentor: R. Mokashi, K. Sorathia. Sponsor: Xerox Research Center India

Prototyped and evaluated a framework for using audio cues interspersed within content to improve student engagement and learning outcomes for middle school children while using e-learning tools. Drew from the cognitive theory of multimedia learning and modeling of working memory.

Designing gestural interactions to enhance smartphone accessibility 2013

Mentor: K. Sorathia. Sponsor: Samsung Research

Conducted research on existing tools and gaps in mobile accessibility. Designed and implemented 9 gestural interactions aimed at improving accessibility of Samsung smartphones.

CaptuRing, tangible user interface for workplace collaboration 2014

Mentor: K. Sorathia

Designed and developed a tangible image capturing tool to document and display collaborative brainstorming in a shared space. Designed interactions for adding, storing, viewing, and deleting content from brainstorming sessions.

WORK EXPERIENCE

Research Assistant, Personal Robots, MIT Media Lab *August 2017 - current*

Developing digital learning techniques for children leveraging AI and Human Robot Interaction. Fostering positive learning behaviors in AI education using Child Robot Interaction.

User Experience Designer, vArmour *March 2017 - August 2017*

Designed the User Experience of several vertical products delivering data center and cloud security through micro-segmentation. Designed and developed data visualizations and GUIs.

Research Associate, Carnegie Mellon University *September 2016 - March 2017*

Designed Audience Participation Games on Twitch. Formed audience participation research questions and conducted user research. Designed surveys and interviews, logged data from games, and managed and processed data in R.

User Experience Designer (Intern), Amazon *Summer 2014*

Designed the User Experience of a desktop based Kindle authoring tool for creating, editing, and enriching Kindle content. Conducted usability evaluation of existing authoring tools. Conducted 6 contextual interviews, developed user personas, scenarios, and user journeys.

Design Lead, Techniche *2013 - 2014*

Led the branding and overall design requirements of Techniche 2014, the annual techno-management festival of IIT Guwahati that observed a participation of 30,000 students. Led a team of 67 designers, event managers, and marketing executives.

User Experience Designer (Intern), Fractal Ink Design Studio — *Summer 2013*

Designed the User Experience of Samsung Club - a series of 6 native mobile apps. Designed the interface for three Windows 8, and one Android application for mobile and tablet for clients including ICICI, Hungama TV, TCS, and Tenlegs.

AWARDS

- Winner, City Robotics Hackathon, MIT Media Lab, 2018
- *Outbreak* - Best Student Non-Digital Game People's Choice Award. Meaningful Play 2016
- TCS 100 Award, Best outgoing student of the institute, IIT Guwahati — 2015
- Kyoorius Student Design Award, Typography — 2014
- Inter-IIT Basketball league - *Silver* 2012 & *Bronze* 2014
- Certificate of Merit for Academic Excellence, BVM, Nagpur — 2009
- Scholarship for Meritorious Performance, Maharashtra Talent Search Examination — 2008

TEACHING & VOLUNTEERING

- MIT Mentor for Clubes de Ciencia Mèxico, in Guadalajara, 2019 edition.
- Red Judge for IBM AI Xprize Competition, 2019.
- Mentor for SheHacks Boston, 2019.
- Design consultant, Merlin - MIT Mental Health.
- Speaker, Education Technology in Frontier Markets, 2018.
- MIT Mentor for Clubes de Ciencia Mèxico, in Chihuahua, 2018 edition.
- Mentor for SheHacks Boston, 2018.
- Digital design workshop at Human Computer Interaction Institute, Carnegie Mellon University.
- Student volunteer, Interaction Design Education Summit 2016, Helsinki, Finland.
- Volunteer teacher, English & Math for 7-12 graders in Nagpur, India as a part of Millat Education Trust, USA.
- Volunteer teacher, English for middle school female students at Shishugram orphanage home, Guwahati, India.
